#### FEBRUARY begins on Wednefday, hath xxix Days.

But even winter has its charms, Where health and plenty reign: Contentment every ill difarms, That tempts us to complain.

This year maids are allowed to court—but not too strongly

#### MARCH begins on Thurfday, hath xxx1 Days.

MARCH comes and shrouds the ample skies;
The icebound trees are torn;
The powdered snow in columns slies,
On airy pinions borne.

SOLAR CALCULATIONS, &c.   Days.   O   Da	On any pinions borne.

#### An INQUIRY into the Effects of SPIRITUOUS LIQUORS upon the Human Body .-- To which is added,

A MORAL and PHYSICAL THERMOMETER.

By BENJAMIN RUSH, M. D. Professor of the Theory and Practice of Medicine in the University of Philadelphia.

BY spirits I mean all those signors brutes of any distillation from fermented junces or substances of any medicine. These liquors were formerly used only in medicine. They now constitute a principal part of the drinks of many countries.

Since the introduction of spirituous liquors into such general ule, physicians have remarked that a number of new diseases have appeared among us, and have described many new symp-toms as common to old diseases. Spirits in their first operation are stimulating upon the system. They quicken the circulation of the blood, and produce some heat in the body. Soon afterwards, they become what is called fedative; that is, they diminish the action of the vital powers, and thereby produce languor and weakness.

The effects of spirituous liquors upon the human body, in producing difeases, are sometimes gradual. A strong constitution, especially if it be affished with constant and hard labour, will counteract the destructive effects of spirits for many years;

but in general they produce the following difeales:

A fickness at the stomach, and vomiting in the morning. This diforder is generally accompanied with a want of appetite for breakfast. It is known by tremors in the hands, infomuch that perfons who labour under it, are hardly able to lift a teacup to their heads, until they have taken a dose of fome cordial liquor. In this diforder, a peculiar palenels, with small red streaks, appear in the cheeks. The flesh of the face, at the same time has a peculiar fulness and flabbiness, which are very different from found and healthy fat.

2. An universal dropty. This disorder begins first in the lower limbs, and gradually extends itself throughout the whole body. I have been told that the merchants in Charleston, Southcarolina, never trust the planters when spirits have produced the first symptom of this disorder upon them. It is very natural to suppose that industry and virtue have become extinct in that man, whose legs and feet are swelled, from the

use of spirituous liquors.

Obstruction of the liver. This disorder produces other diseases, such as an inflammation, which sometimes proves fuddenly fatal; the jaundice, and a dropfy of the belly.

4. Madness. It is unnecessary to describe this disease with all its terrours and confequences. It is well known in every

township, where spirituous liquors are used.
5. The pally. 6. The apoplexy; and 7. The Epilepsy, complete the group of difeases produced by spirituous liquors. I do not affert that thefe diforders are never produced by any other causes, but I maintain that spirituous liquors are the most frequent causes of them, and that when a predisposition to them is produced by other causes, they are rendered more certain and more dangerous by the intemperate use of spirits.

I have only named a few of the principal diforders produced by spirituous liquors. It would take up a volume to describe

how much other disorders natural to the human body, are increased and complicated by them. Every species of inflammatory and putrid sever, is rendered more frequent and more

obstinate by the use of spirituous liquors.

The danger to life from the disease which have been mentioned is well known. I do not think it extravagant therefore to repeat here, what has been often said, that fpirituous liquors destroy more lives than the fword. War has its intervals of destruction; but spirits operate at all times and seasons, upon human life. The ravages of war are confined to but one part of the human species, viz. to men, but spirits act too often upon persons who are exempted from the dangers of war by age or sex; and lastly, war destroys only those persons who allow the use of arms to be lawful, whereas spirits infinuate their statal effects among people, whose principles are opposed to the effusion of human blood.

Let us next turn our eyes from the effects of spirits upon health and life, to their effects upon property; and here fresh scenes of misery open to our view. Among the inhabitants of cities they produce debts, disgrace and bankruptcy. Among farmers, they produce idleness, with its usual consequences, such as houses without windows, barns without roofs, gardens without inclosures, fields without tences, hogs without vokes, sheep without wool, meagre cattle, seeble horses, and half clad, dirty children, without principles, morals, or manners. This picture is not exaggerated. I appeal to the observations of every man whether such scenes of wretchedness

do not follow the tracks of spirituous liquors.

It we advance one step further, and examine the effects of spirituous liquors upon the moral faculty, the prospect will be still more distressing and terrible. The first effects of spirits upon the mind shew themselves in the temper. I have constantly observed men who are intoxicated in any degree with spirits, to be peevish and quarressome; after a while they lose by degrees the moral sense. They violate promises and engagements without shame or remorfe. From these desciencies in veracity and integrity, they pass on to crimes of a more heinous nature. It would be to dishonour human nature only to name them.

Thus have I, in a few words, pointed out the effects of spirituous liquors upon the lives, estates, and souls of my fellow creatures. Their mischiefs may be summed up in a few words. They fill our church yards with premature graves, they fill the sheriff's docket with executions, they crowd our jails, and lastly, they people the regions of—; but it belongs to another profession to shew their terrible consequences in the suture

world.

I shall now proceed to combat some prejudices in favour of the use of spirituous liquors.

There are three occasions in which spirits have been thought

necessary and useful.

1. In very cold weather.

2. In very warm weather. And

3. In times of hard labour.

1. There cannot be a greater error than to suppose that spiritnous liquors lessen the effects of cold upon the body. On the contrary I maintain that they always render the body more

liable to be affected and injured by cold. The temporary warmth they produce, is always succeeded by chillness. If any thing besides warm clothing and exercise is necessary to warm the body in cold weather, a plentiful meal of wholesome food is at all times sufficient for that purpose. This, by giving a tone to the stomach, invigorates the whole system, while the gentle sever created by digestion adds considerably to the natural and ordinary heat of the body, and thus renders it less sensible of the cold. A piece of meat well peppered, and a drink of cyder or water, well gingered, will enable a person to travel in the coldest day or night, without receiving any injury from the weather.

2. It is equally abfurd to suppose that spirituous liquors lessen the effects of heat upon the body. So far from it, they rather increase them. They add an internal heat to the external heat of the sun; they dispose to severs and inslammations of the most dangerous kinds; they produce preternatural sweats which weaken, instead of an uniform and gentle perspiration which exhibitarates the body. Half the diseases which are said to be produced by warm weather, I am persuaded are produced by the spirits which are

swallowed to lessen its effects upon the system.

3. I maintain with equal confidence, that spirituous liquors do not lessen the effects of hard labour upon the body. Look at the horse, with every muscle of his body swelled from morning until night in the plough, or the team, Does he make signs for spirits to enable him to cleave the earth, or to climb a hill? No. He requires nothing but cool water and substantial sood. There is neither strength nor nourishment in spirituous liquors. If they produce vigour in labour, it is of a transient nature, and is always succeeded with a sense of weakness and fatigue. These facts are sounded in observation; for I have repeatedly seen those men perform the greatest exploits in work, both as to their degrees and duration, who never tasted spirituous liquors.

But are there no conditions of the human body in which spirituous liquors are required? Yes; there are, 1st. In those cases where the body has been exhausted by any causes, and faintness, or a stoppage in the circulation of the blood has been produced, the sadden stimulus of spirits may be necessary. In this case we comply strictly with the advice of Solomon, who confines the use of "strong drink" only to him "that is ready to perish!" And 2dly. When the body has been long exposed to wet weather, and more especially if cold be joined with it, a moderate quantity of spirits is not only proper, but highly useful to

obviate debility, and thus to prevent a fever. to be the only two cases that can occur, in which spirituous

liquors are innocent or necessary.

But if we reject spirits from being part of our drinks, What liquors shall we substitute in the room of them? For cultom, the experience of all ages and countries, and even nature herself, all seem to demand drinks more grateful and more cordial than simple water.

To this I shall reply, by recommending in the room of

spirits, in the first place,

This excellent liquor contains a small I. CYDER. quantity of spirit, but so diluted and blunted, by being combined with an acid and a large quantity of faccharine matter and water, as to be perfectly inoffenfive and whole-It disagrees only with persons subject to the rheumatism, but it may be rendered inoffensive to such people by extinguishing a red hot iron in it, or by diluting it with water. It is to be lamented that the late frosts in the spring often deprive us of the fruit which affords this liquor. But the effects of these frosts have in some measure been obviated by giving an orchard a northwest exposure, so as to check too early vegetation, and by kindling two or three large fires of brush and straw to windward of the orchard, the evening before we expect a night of frost. This last expedient has in many instances within the compass of my knowledge, preserved the fruit of an orchard, to the great joy and emolument of the ingenious husbandman.

2. BEER is a wholesome liquor compared with spirits. The grain from which it is obtained is not liable, like the apple, to be affected with frost, and therefore it can always be procured at a moderate expense. It abounds with nourishment; hence we find many of the common people in Greatbritain endure hard labour with no other food than a quart or three pints of this liquor, with a few pounds of bread in a day. I have heard with great pleafure of breweries being fet up in feveral of the principal county towns of Pennsylvania, and I esteem it a sign of the progress of our State in wealth and happiness, that a single brewer in Chester county sold above 1000 barrels of beer last year. While I wish to see a law imposing the heaviest taxes on whisky distilleries, I should be glad to see breweries (at least

for some years) wholly exempted from taxation\*.

WINE is likewise a wholesome liquor, compared with spirits. The low wines of France I believe could be drank at a less expense than spirits in this country. The peasants in France, who drink these liquors in large quantities, are a healthy and fober body of people. Wines of all kinds,

\* A gentleman now living renumbers when there were ten or twelve brewhouses in Boston, and but two distilluctes. How saddy is the case no reversed!

yield, by chymical analysis, the same principles as cyder, but in disserent proportions; hence they are both cordial and nourishing. It is remarked that sew men ever become habitual drunkards upon wine. It derives its relish principally from company, and is seldom, like spirituous liquors, drank in a chimney corner or in a closet. The effects of wine upon the temper are likewise in most cases directly opposite to those that were mentioned of spirituous liquors. It must be a bad heart, indeed, that is not rendered more cheerful and more generous by a few glasses of wine.

4. VINEGAR and WATER (weetened with fugar or molasses, is the best drink that can be contrived in warm weather. I beg leave to recommend this wholesome mixture to reapers in a particular manner. It is pleafant and cooling. It promotes perspiration, and resists putrefaction. Vinegar and water constituted the only drink of the foldiers of the Roman republick; and it is well known that they marched, and fought, in a warm climate, and beneath a load of arms that weighed fixty pounds. Boaz, a wealthy farmer in Palestine, we find treated his reapers with nothing but bread dipped in vinegar. Say not, that spirits have become necessary in harvest, from habit and the custom of the country. The custom of swallowing this liquid fire, is a bad one, and the habit of it may be broken. Let half a dozen farmers in a neighbourhood combine to allow higher wages to their reapers than are common, and a sufficient quantity of any of the liquors I have recommended, and they may foon abolish the practice of giving them spirits. They will in a little while be delighted with the good effects of their affociation. Their grain will be fooner and more carefully gathered into their barns, and an hundred difagreeable scenes of sickness and contention will be avoided, which always follow in a greater or less degree the use of spirituous liquors. Under this head, I should not neglect to recommend buttermilk and water, or four milk (commonly called bonneclabber) and water. It will be rendered more grateful by the addition of a little fugar.-PUNCH is likewise calculated to lessen the effects of heat and hard labour upon the body. The spirit in this liquor is blunted by its union with the vegetable acid. possesses not only the constituent parts, but most of the qualities of cyder and wine. To render this liquor perfectly innocent and wholesome, it must be drank weak, in moderate quantities, and only in warm weather.

There are certain classes of people to whom I beg leave to suggest a caution or two upon the use of spirituous

liquors.

1. Valetudinarians, especially those who labour under disorders of the stomach and bowels, are very apt to fly to spirits for relief. Let such people be cautious how they repeat this dangerous remedy. I have known many men and women of excellent characters and principles, who have been betrayed by occasional doses of gin or brandy to ease the cholick, into a love of spirituous liquors, infomuch that they have afterwards fallen sacrifices to their stall effects. The different preparations of opium are a thousand times more safe and innocent than spirituous liquors, in all spasmodick affections of the stomach and bowels. So apprehensive am I of the danger of contracting a love for spirituous liquors, by accustoming the stomach to their stimulus, that I think the sewer medicines we exhibit

in spirituous vehicles the better.

2. Some people from living in countries subject to the intermitting fever, endeavour to fortify themselves against it by two or three glasses of bitters made with spirits every day. There is great danger of men becoming fots from this practice. Besides, this mode of preventing intermittents is by no means a certain one. A much better fecurity against them is to be found in the Jesuits bark. spoon full of this excellent medicine taken every morning during the fickly leason, has in many instances preserved whole families in the neighbourhood of rivers and mill ponds from fevers of all kinds. Those who live in a fickly part of the country, and who cannot procure the bark, or who object to taking it, I would advise to avoid the morning and evening air in the fickly months, to kindle fires in their houses on damp days, and in cool evenings, throughout the whole fummer, and to put on woollen clothing about the first week in September. The last part of this direction applies only to the inhabitants of the middle states. These cautions I am persuaded will be more effectual in preventing autumnal fevers than the best preparations that can be made from bitters in spirits.

3. Men who follow professions that require a constant exercise of the mind or body, or perhaps of both, are very apt to seek relief from satigue in spirituous liquors. To such persons I would beg leave to recommend the use of TEA instead of spirits. Fatigue is occasioned by the obstruction of perspiration. Tea, by restoring perspiration, removes satigue, and thus invigorates the system. I am no advocate for the general or excessive use of tea. When drank too strong, it is hurtful, especially to the semale constitution; but when drank of a moderate degree of strength, and in moderate quantities, with sugar and cream or milk,

I believe it is in general innocent, and at all times to be preferred to fpirituous liquors. One of the most industrious schoolmasters I ever knew, told me that he had been preferved from the love of spirituous liquors by contracting a love for tea in early life. Three or four dishes drank in an asternoon, carried off the fatigue of a whole day's labour in his school. This gentleman lived to be 71 years of age, and afterwards died of an acute disease, in the full exercise of all the faculties of his mind.

To every class of my readers, I beg leave to suggest a caution against the use of TODDY or GROG. knowledge that I have known some men, who, by limiting its strength, constantly measuring the spirit and water, and by drinking it only with their meals, have drunk toddy or grog for many years without fuffering in any degree from it; but I have known many more who have been infensibly led from drinking toddy for their constant drink, to take drams in the morning, and have afterwards paid their lives as the price of their folly. I shall select one case from among many that have come within the compass of my knowledge, to shew the ordinary progress of intemperance in the use of spirituous liquors. A gentleman, once of a fair and sober character, in the city of Philadelphia, for many years drank toddy as his constant drink. From this he proceeded to drink grog. After a while nothing would fatisfy him but flings made of equal parts of rum and water, with a little fugar. From flings he advanced to raw rum, and from common rum to Jamaica spirits. Here he rested for a few months; but at last he found even Jamaica spirits were not strong enough to warm his stomach, and he made it a constant practice to throw a table spoon full of ground pepper into each glass of his spirits, in order, to use his own expression, "to take off their coldness." It is hardly necessary to add, that he soon afterwards died a martyr to his intemperance.

I shall conclude what has been said of the effects of spirituous liquors, with two observations.

1. A people corrupted with strong drink cannot long be a FREE people. The rulers of such a community will soon partake of the vices of that mass from which they are selected, and all our laws and governments will sooner or later bear the same marks of the effects of spirituous liquors, which were described formerly upon individuals. I submit it therefore to the consideration of our legislatures, whether more laws should not be made to increase the expense and lessen the consumption of spirituous liquors, and whether some mark of publick infamy should not be inflicted by law upon

every man, convicted before a common magistrate, of drunkenness.

The second and last observation I shall offer, is of a serious nature. It has been remarked that the Indians have diminished every where in America since their connexions with the Europeans. This has been justly ascribed to the Europeans having introduced spirituous liquors among them. Let those men who are every day turning their backs upon all the benefits of cultivated fociety, to feek habitations in the neighbourhood of Indians, confider how far this wandering mode of life is produced by the fame cause which has scattered and annihilated so many Indian tribes. Long life, and the Tecure possession of property, in the land of their ancestors, was looked upon as a bleffing among the ancient Jews. For a fon to mingle his dust with the dust of his father, was to act worthy of his inheritance; and the prospect of this honour often afforded a consolation even in death. However exalted, my countrymen, your ideas of liberty may be, while you expose yourfelves by the use of spirituous liquors to this consequence of them, you are nothing more than the pioneers, or in more flavish terms, the "hewers of wood" of your more industrious neighbours.

If the facts that have been stated, should produce in any of my readers who have suffered from the use of spirituous liquors, a resolution to abstain from them hereaster, I must beg leave to inform them that they must leave them off suddenly and entirely. No man was ever gradually reformed from drinking spirits. He must not only avoid tasting, but even smelling them, until long habits of abstinence have subdued his affection for them. To prevent his feeling any inconveniences from the sudden loss of their stimulus upon his stomach, he should drink plentifully of camomile or of any other bitter tea, or a few glasses of found old wine every day. I have great pleasure in adding, that I have seen a number of people who have been effectually restored to health, to character, and to usefulness to their families and to society, by following this

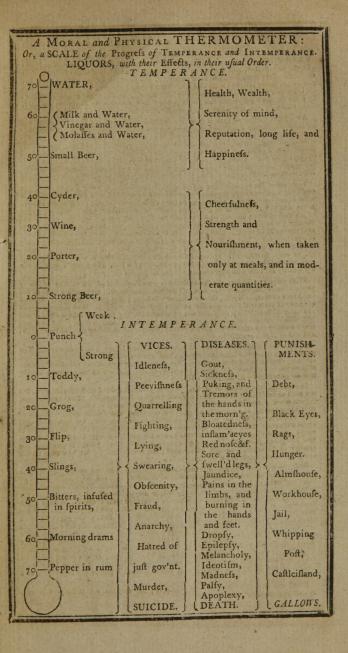

advice.

#### RUM!

MAKETH a man a beast !—clotheth him with rags !—brings on disease ! and too often setcheth him to the gallows !—Beware then of strong liquor !

VACATIONS AT HARVARD COLLEGE.

ROM commencement, four weeks. From the 3d Wednefday in October, two weeks. From the first Wednesday in anuary, five weeks. From the second Wednesday in April,

#### ADVICE to COUNTRY TAVERN KEEPERS.

WhEN a perfon fets up to keep a publick house, he ought to make it his peculiar fludy, to accommodate travellers of all classes.—The publick have an undoubted right to expect it, and the more a tavern keeper lays himself out to accommodate those travellers that give him their company, the more he increases, his reputational consequently acquires more custom. Here I would remark, that whatever extraordinary fare the tavern keeper provides for his guest, he ought to be paid accordingly; but he must remember that he should try to accommodate all—some like rum, some like strong beer, some cyder, some wine, &c.

As a great deal of cuftom is necessary to make good markets and good inns, and as there is but little travelling, except on publick roads, the question is, how shall tayerners on private roads, where there is but little travelling, make provision for extertaining gentlemen well, who are willing to pay for it, without fullering great loss. I speak not of provision for comurty people, for these are willing to take cyder and pot lucks, or the common fare of the taverner's own family; but I speak of provision for people who have been accustomed to a city life and better cookery and liquors. It appears to me that provision for the latter may be made, without needless waster.

You cannot, for example, buy a pipe of Madeira wine of the first quality—but you can keep a gallon or two for many months—and when gentlemen find a galas of good wine in the country, they are willing to give a good price for it. But I would recommend it to you to be more careful in the choice of your wine. Few of you are judges of wine—and when you purchase, the wine sellers turn you off with any adulterated mixture they please. After a great number of experiments, I can safely declare, that nine times out of ten, the wine I have called for in country taverns has been a mixture of cyder, molasse, and a little read wine; or brandy and wine, and not unfrequently with a strong tincture of sugar of lead. Such mixtures pass, in the country, for Malaga, or other sweet wine. To avoid impositions in purchasing wine, get some gentleman who has always been used to wine to choose it for you, and keep a little of she best quality for such passengers as are willing to pay for it.

With respect to spirits, the same advice is necessary—but of the quality of spirits you are better judges, and therefore less liable to imposition. Keep also a little of the best kinds of teas, as Hydon, Gunpowder, or Souchong; and good loaf fugar. A small quantity of each will serve you for perhaps sive or fix months. Most passengers will not want these articles; they will not be able or willing to pay for them—but a sew will wish for them, because they have always been accustomed to them; and you must make a difference of price between a breakfast or supper of Bobea tea and fryed pork, and one of Hyson tea and loaf sugar.

With respect to meat, there is no difficulty if you will have a little forefight. You cannot indeed have fresh meat every day, and gentlemen do not like boiled pork and cabbage, cooked and dished together. But if you will every winter provide a number of good hams and beeves' tongues, you may, in the warmest weather, spread a table that no gentleman will find fault with.

In cooking, take a word of advice. Use the gridiron instead of the frying pan. Do not roast or broil meat until it is a sidry and tough as soal leather. Meat slightly done, is both more palatable and more healthy. Do not boil meat and vegetables together, unless you put the vegetables in a bag. Do not bring upon table different kinds of meat in the same dish; nor meat and vegetables in the same dish. Let each be brought on in a sparate dish. Do not kill a fowl and put it warm over the fire. A fowl is tough and good for nothing, unless it has been killed 24, or at least 12 hours. When you bring on liquors, endeavour to give every one a separate glass. If you have not enough in the house, you will be excused; but gentlemen do not like that all the company should drink out of the same vessel.

Endeavour to accommodate different companies with different rooms. Nothing is more diffagrecable than to crowd a number of flrangers into the fame room; or to oblige travellers to fit down with grog drinkers in the bar room. Farnish yourfelves, if possible, with beds enough to give every lodger one to himself. It is a monstrous indecent, as well as unfafe practice, for persons, perhaps total strangers, to sleep in the same bed. It is an afrient to a man to request it. And a word to you about keeping your beds clean. Give every decent man a decent bed. Every one ought to have clean fresh sheets, it is an imposition to ask a man to lie on sheets, that have before bear latin on by you know not who; you say it is a great trouble—very well, then make your lodgers pay for the trouble. Those who expect clean beds are willing to pay for them. In the bot months, take special care that the beds are not inselted with bugs. This is an article of advice very necessary for many of you. It is a filthy infamous negligence which suffers these animals to trouble your lodgers. Nothing is more offensive to travellers, and nothing does more towards tripuring the reputation of a tavern.

I trust you will take these hints in good part; for they are meant for your benefit, as well as those who travel.

#### PREMATURE DEATHS.

er Not to destroy men's lives, but to save them."

It having been lamented, that the means recommended by the HUMANE SOCIETY for reftoring suspended animation, were not more generally known, the Editor takes an opportunity of presenting his readers with the following CAUTIONS and DIRECTIONS for preserving Human Life from and under various cases of sudden Danger and seeming Death, from Convulsions, Drowning, Strangling, Trance, Suffocation, Bruises, Swoon, Stupesaction, Frost, Intoxication, Starving, Poison, Fits, Weakness, Bleeding, Stillbirth, or the stroke of Lightning.

CAUTIONS.

MODERATE your passions.—Discontinue all drunkenness.— Discourage all sighting, except in needful desence of your country.—When you seel wery uneasy, remember, that "While there is life, there is hope," and russ God for better times, doing your best meanwhile. It is good also to tell your distress to a steady

friend.

Most sudden deaths come by water, therefore in, on, or near is, have care, not sear.—Keep wells covered; hinge tops are readicst.—Fill up holes in any ford, or bathing place.—Rail, sill, or slope off pits in dangerous parts.—Watch gravel pits when working in them.—Place no drunken man on horseback,—Leave nothing poisonous open.—Lay loaded guns in safe places, and newer imitate siring in jest, nor leave gunpowder open.—Stand not near a tree in lightning, neither under any lead or iron.—Be wary of children, both in bed and up.—Beware of damps under ground when the wick of a light quickly goes out; aring and warming them at first may prevent barm.—In attending fermenting liquors, when giddiness begins get air.—Never sleep near charcoal, when drowsly at work by it, get fresh air.—When numb'd with cold, rub yourself if you can with snow, and beware of sleeping—Lay not out a corpse till it has a dark colour, or dead smell; or till medical gentlemen find certain marks of death; yet let it be carried well wrapped to a borrowed room, if the bouse be crowded, and a shell pitched at the joints be ready to prevent infection. Fire at the receiving room would be very needful.

DIRECTIONS for preserving life under seeming death.
Nothing to be done by common assistants, but what is here said.
Only six persons to be ever present. To continue help six hours,
if not sooner successful, unless the body be rotten, or the brain

torn.

FROZEN. First person.—Rub the body with snow or cold water. Take it to a bouse, but not near the fire.—Second person.—When be has helped the body into the first bouse, go for the nearest physician or surgeon, whose directions are to be strictly observed.—Third and fourth.—Help the first to bring on warmth by slow degrees, by rubbing and blowing into it to imitate natural breath. How this is to be done, see below, under drowned Suffocated, by Steam, Smoak, or Lightning. First per-

SUFFOCATED, by Steam, Smoak, or Lightning. First perfon.—Dash the breast and face with cold water. Take the body to a bouse, and lay it on a bed from the fire.—Second person.—Af-

ter helping in the body, go for the nearest physician or surgeon, whose directions are to be strictly observed.—Third and fourth.—Help the sirst in the above, then rub the body gently, blow into it, and try to make it breathe. How this is to be done see below.

DROWNED. First Person.—Get out the body, wipe it, and cover it warm. Take it to the nearest bouse; the bead rather raised. In hot weather, lay it stripped on a bed to the sun; in cold or damp weather, in a room kept warm and airy. Rub it gently with the bands, or stannels sprinkled with spirits, on the back bone, breast, Sc. Get bot water to lay in bottles to the soles of the feet, palms of the bands, and armpits. Hot bricks in stannels may also be used. Place the body, if possible, between two healthy persons in bed. Lay a stannel on the back, and move a warming pan upon it.

Second Person .- As soon as the body is housed, go for the near-

est physician or surgeon.

Third and fourth. - Help the first as above; also in blowing up one nostril with a bellows, stopping the other nostril and the mouth, and pressing the breast gently with the hands to imitate breathing, and repeat it often. Give glisters with fall gruel or to-bacco smoke; if a woman or child, smoke of dried herbs; a bladder with a quill or pipe may do; blow at the bowl end Is warm bath, grains lyes, or ashes can be had, place the body therein, moderately heated, to recover the natural heat. When life begins to appear, try if the power of swallowing be returned, with a spoonful of warm water, then wine and water, or brandy and water, and lay the body sideways in bed, with the head rather raised. Clear the mouth of slime.

rather raised. Clear the mouth of stime.

The same methods may be followed in all other cases above named, till medical gentlemen direct otherwise. Let an electrifying machine be had where it can, which may best help the medi-

cal assistant to determine death.

### EXPLANATION OF THE CALENDAR PAGES.

Bolar Calculationg.

IN each page at the left hand, under SOLAR CALCULATIONS, &c. stands the true place of the Sun in the Feliptick for every second day in the month. After which the first column shews the days of the month—the second, the days of the week—the third, the observable days, &c.—the fourth, the rising of the Sun in hours and minutes—the fifth, his setting—the fixth, the length of the days—the seventh, the clock equations, or variation of the Sun from the clock in minutes, and the eighth, his declination.

Aunar Calculations.

On the left hand pages, under LUNAR CALCULATIONS, &c. the first column shows the days of the month—the second, the days of the week—the third, the spring tides, weather, &c.—the fourth, the moon's age—the fifth and fixth, the morning and evening tide—the seventh, the moon's place in the signs—the eighth, her rising and setting—the ninth, her southing.

	iting—the ninth, her fourthing.
